Just
push
and

No needles to flutter... no calculations to make. In two seconds the exposure time, aperture and light value appear in the window of the BEWI... no time wasted translating into f stops. Working on the same principle as a modern computing machine, BEWI Meters provide automatic memory control... permanently record your reading until the next shot. So revolutionary in concept, so functional in design, so simple to use... you will be proud to be among the first to own one.

The World's Only
Automatic

Push-Button
Exposure Meters

BEWI

(pronounced Bee Woo)

New BEWI Automat "B" features direct readings for both incident and reflected light, ASA 2.5 to 3200, lens stops from f:1.4 to f:32 and shutter speeds from 1/1000 sec. to 8 minutes. New LVS scale from 1 to 19 plus movie speeds from 8 to 128 fps make it completely versatile. With shock-absorbing leather case, perlon carry cord and incident light diffuser. **\$29.50**

New BEWI Automat "C" Clip-On works almost like a built-in meter, fits all cameras with a standard accessory clip. Can be read easily without turning the camera from a shooting position. With shock-absorbing leather case and incident light diffuser. **\$22.50**

SEE for yourself. Ask your photo dealer for a demonstration of New BEWI Meters TODAY or Write for Free Booklet.
